AI Engineer | GenAI, Agentic AI & AWS Bedrock | FastAPI | Python

AI Engineer with experience designing and deploying GenAI, LLM-powered, and serverless applications on AWS. Hands-on experience with AWS Bedrock, FastAPI, Prompt Engineering, RAG workflows, and AI-powered document processing systems. Built production-grade solutions for project estimation, transcript analysis, and healthcare automation using Python, Lambda, DynamoDB, and cloud-native architectures.

WORK EXPERIENCE

BizCloud Experts **02/2025 – Present** **Software Engineer • Full-time** **Hyderabad**

- Designed and deployed AI-powered serverless applications using AWS Bedrock, Lambda, API Gateway, DynamoDB, S3, and SES.
- Built GenAI solutions for automated project estimation, document processing, recommendation systems, and transcript analysis.
- Developed and maintained FastAPI-based backend services for AI-driven enterprise applications.
- Integrated LLMs into production systems to automate analysis, summarization, and business decision support.
- Collaborated with Solution Architects and stakeholders to design scalable cloud-native AI solutions.

EDUCATION

PG Diploma in Artificial Intelligence & Machine Learning University of Hyderabad Hyderabad • 06/2024 – 08/2025

B.Tech in Electronics & Communication Engineering Jawaharlal Nehru Technological University Hyderabad Hyderabad • 08/2018 – 08/2022

CERTIFICATIONS

AWS Certified Developer – Associate

AWS

AWS Certified AI Practitioner

AWS

AWS Certified Cloud Practitioner

AWS

PROJECTS

AI-Powered Support Ticket Resolution System 05/2026 – Present

- Developed an AI-powered support automation system to monitor Redmine tickets, generate AI summaries, and recommend resolutions using historical ticket data.
- Implemented retrieval-based search across historical tickets and documentation to improve troubleshooting and resolution accuracy.
- Integrated LLM-powered analysis for ticket classification, root-cause identification, and automated support recommendations.
- Tech:** Python, Redmine API, AWS Bedrock, FastAPI, FAISS, Google Chat.

AI Study Companion

03/2026 – 04/2026

- Built a RAG-powered learning assistant using Gemma models and vector-based semantic retrieval.
- Developed FastAPI backend services for contextual question answering and personalized learning support.
- Implemented document ingestion, embedding generation, and retrieval workflows.
- Integrated modern GenAI techniques for context-aware educational assistance.

AI Project Estimation System (AWS Bedrock – Nova 2 Lite)

08/2025 – 12/2025

- Built an AI-powered project estimation platform to automate effort and cost estimation for Solution Architects.
- Processed requirement documents (PDF, DOCX, TXT) and generated role-wise effort breakdowns using AWS Bedrock Nova.
- Designed prompt-engineering workflows to generate consistent project timelines and resource allocation recommendations.
- Generated structured JSON and CSV outputs for downstream business reporting and analytics.
- Implemented serverless architecture using AWS Lambda, API Gateway, S3, and Parameter Store.

Legacy Healing

09/2025 – 12/2025

BizCloud Experts

- Developed an LLM-powered transcript analysis API using Amazon Bedrock to generate sentiment insights and confidence scoring.
- Automated medical document ingestion and processing using SES, Lambda, DynamoDB, and S3.
- Built cloud-native workflows for healthcare communication automation and document management.
- Deployed secure infrastructure using Terraform and AWS CloudFront.

SKILLS

AI/GenAI: Agentic AI, Amazon Nova, C++, Claude, LLMs, NLP, Prompt Engineering, RAG, Sentiment Analysis, Vector Search

Frameworks: CrewAI(learning), FastAPI, LangChain, Strands Agents SDK

Databases: DynamoDB, FAISS, MySQL, Pinecone, PostgreSQL, Weaviate

Cloud: API Gateway, AWS Bedrock, CloudFront, DyanmoDB, Lambda, Route53, S3, SES, Terraform

Programming: Java, Javascript, Python, SQL
